SKIN

Angelo Pinaffo / 2021

Designed in collaboration with Angelo Pinaffo, SKIN is the combined result of hi-tec engineering, quality design and Diemme experience. A chair capable of giving a fantastic feeling of natural balance combined with a strikingly unique look. Its ergonomic shapes assure a healthy sit, while its sophisticated functions are discreetly tucked away to make it elegantly minimalist. The SKIN chair is an ideal solution for the needs of today's office.

Evolution of the office chair

Elegant design, carefully balanced proportions and concealed ergonomic functions. This new Diemme task chair is conceptually different, revolutionising the whole idea of office chairs. Through rigorous subtraction, a light and slinky product has been achieved, with a backrest that is almost imperceptible when seen in profile, yet enveloping once seated. The innovative backrest ensures that the outer shell merges into one with the front, whether this be fully upholstered or in the various mesh finishes. The SKIN chair offers countless customisation options to satisfy individual users. The choice between different mechanisms, types of backs, bases and armrests, as well as different colours and upholstery, allow each individual user and each company to find their own SKIN.

The light and fluid shapes of SKIN's backrest conceal dynamic and very important functional features. A hidden and innovative 3D lumbar support, especially designed for Diemme, is height-adjustable via levers that are comfortably accessed when seated.

The supporting frame in partially regenerated polypropylene has a composition that makes it unusually flexible to the user's movement, thus allowing maximum freedom and ergonomic comfort in all positions.

FLEXIBILITY
